

## Work around for downloading HURREVAC Storm Files into Hazus-MH

Hazus-MH Hurricane Model has a convenient method for downloading the latest HURREVAC Storm Files while creating a new hurricane storm scenario through the Hazus-MH Hurricane Scenario Wizard.

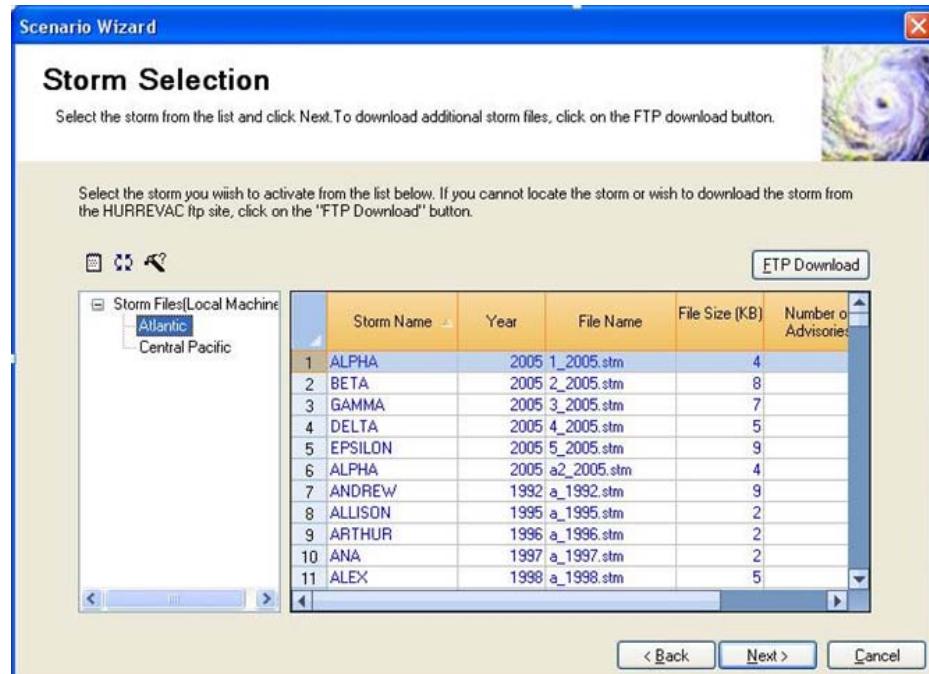

Figure 1Hazarus-MH Hurricane Scenario Wizard

Support for HURREVAC 2000 was discontinued at the end of 2011. As a result, the FTP Download Tool in Hazus no longer works. Pending the implementation of a permanent fix, the following steps provide a temporary workaround for downloading HURREVAC storm files:

1. Outside of Hazus-MH, go to one of the following:
  - a. Atlantic Storm File Path:

<http://data.hurrevac.com/STMFiles/Atlantic/>

- b. Central Pacific Storm Path:

<http://data.hurrevac.com/STMFiles/CentPac/>

2. Review the list of files.

## Index of /STMFiles/Atlantic

	<a href="#">Name</a>	<a href="#">Last modified</a>	<a href="#">Size</a>	<a href="#">Description</a>
	<a href="#">Parent Directory</a>		-

Figure 2 Internet Explorer View of Storm Files

3. Download the desired file by right clicking on the file name and select “Save Target As”. Then save to one of the following locations:

- a. Atlantic Storm File Path:

<Install Location>\Hazar-MH\Data\HU\Hurrevac\StormFiles\Atlantic  
(e.g. C:\Program Files\Hazar-MH\Data\HU\Hurrevac\StormFiles\Atlantic)

- b. Central Pacific Storm Path:

<Install Location>\Hazar-MH\Data\HU\Hurrevac\StormFiles\CentralPacific  
(e.g. C:\Program Files\Hazar-MH\Data\HU\Hurrevac\StormFiles\CentralPacific)

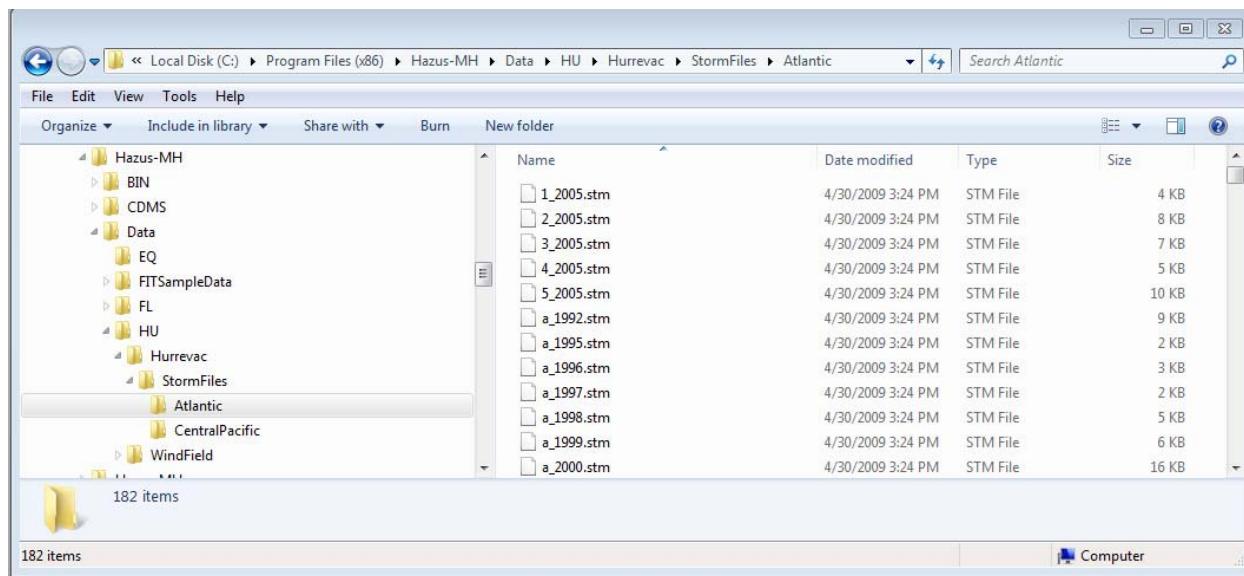

Figure 3 Storm File Download Location (Windows 7)

4. Return to the Hurricane Scenario Wizard and refresh the list. The new storm should be on the list.
